Date of birth: 11/12/2001 - **Nationality:** Indian - **Marital status:** Single - **Gender:** Male

Career Objective

Software Developer with 1 years of experience in building responsive and scalable web applications using Angular, JavaScript, HTML, and CSS. Skilled in writing clean, efficient code and integrating RESTful APIs. A collaborative team player focused on performance, usability, and continuous learning.

Software Developer

June 2024 to July 2025

BayGrape Technologies - Bangalore, India

- Designed, developed, and optimised efficient, scalable, and well-tested code for various software projects, ensuring high performance and maintainability.
- Collaborated with team members to identify, troubleshoot, and resolve software bugs, improving application stability and user experience.
- Contributed to the full software development lifecycle, from planning and development to testing, deployment, and maintenance.

Software Intern

May 2023 to October 2023

Nohitatu Technologies - Chennai, India

- Assisted in designing, developing, and testing software applications, ensuring functionality and performance met project requirements.
- Collaborated with senior developers to write clean, efficient, and well-documented code for various features and enhancements.
- Performed functional testing to identify, document, and resolve software bugs, improving system stability and user experience.
- Worked with cross-functional teams to understand business requirements and translate them into development tasks.
- Gained hands-on experience with software development methodologies, debugging techniques, and version control systems.

Skills

- HTML
- CSS
- Bootstrap
- JavaScript
- TypeScript
- Angular
- RxJs
- REST APIs
- Azure DevOps
- Git - Version Control

Education

B tech : **Computer Science Engineering**, 2023

Dr. M.G.R. Educational and Research Institute - Chennai, IN-TN

Docsnow – BayGrape Technologies

Role: Junior Software Developer

A cloud-based solution that automates the collection and verification of client documents from multiple sources.

- Worked on modules like Settings and Cron Schedulers
- Implemented multilingual support across the project using ngx-translate
- Translated Figma designs into responsive Angular pages
- Integrated APIs, performed functional testing, and fixed bugs
- Used Angular and USWDS for development

Human Resource Management System – BayGrape Technologies

Role: Junior Software Developer

A web-based HR platform inspired by OrangeHRM to streamline employee records, payroll, leave, attendance, and onboarding processes.

- Developed the application from scratch
- Implemented employee management CRUD, onboarding, profile, leave and attendance modules
- Created payslip generation and multi-role login (Admin, HR, Employee)
- Integrated APIs and designed a user-friendly interface
- Used Angular and Bootstrap for development

Phicure – Nohitatu Technologies

Role: Front End Developer

A healthcare platform that connects providers, payers, and patients to improve claims handling and communication.

- Developed responsive and user-friendly web interfaces using **HTML5, CSS3, JavaScript**, and **Angular**.
- Collaborated closely with back-end developers and designers to ensure cohesive implementation of UI/UX features.

Hobbies and interests

- **Photography & Photo Editing** – Passionate about capturing moments and enhancing visuals through creative editing.
- **Strength Training** – Committed to fitness and building strength through disciplined training routines.
